

Track Equipment

Auxiliary equipment such as rollers, graders and tractors are moved to and from worksites. Sometimes equipment is lost. The "Track Equipment" feature of the Dump Truck System tracks equipment movement and will print a report showing the current location of your assets.

Movements are entered on the [Tracking] tab on the Equipment File. Pull up the equipment and click on the **[Add]** button. Enter the date moved, driver and location.

The "Current Location" report is called by clicking on the **[Reports...]** button and selecting, "Equipment Tracking, Current Location Report". The following figure displays a sample report.

| EQUIPMENT TRACKING | | | | | 08/09/2018 |
|--------------------|-------------|----------|-----------------|----------------------------|------------|
| Current Locations | | | | | 07:20 PM |
| Unit No | Description | Moved | Driver | Location | |
| 0015 | BW 190 AD-4 | 08/09/18 | FRED FLINTSTONE | FLINT SHOPPING CENTER | |
| 0016 | BW 190 AD-4 | 08/01/18 | JIM JONES | APPIAN WAY, 10 MILE MARKER | |
| 1000 | BW 190 AD-4 | 08/09/18 | BARNEY RUBBLE | CROSSROADS SHOPPING CENTER | |
