

## Newsletter January 2025

In this issue:

1. Exporting Information and Viewing Documents
2. Revenue by Billing Code
3. IFTA Reporting

# Dump Truck Software LLC

## Exporting Information and Viewing Documents

As you are aware, invoices and statements can be sent to a PDF with the click of a button. The Dump Truck System (DTS) also provides many more abilities to export information and display files that have been scanned and stored on your computer.

The following User Preferences screen shows the many options available and allows you to define the storage location. If you are on a networked system, the folders and images should be stored on the main computer. To reference the location, the \\ should be used. For example: `\\server\brasl\PDFs`. The name of the main computer in this example is called Server. The brasl folder has been shared to the network. Please call for assistance in setting this up.

User Preferences (UtCustUs)

New in version 24.36 is the splitting out of PDFs and Excel files into separate folders. If the freight bills are scanned and placed in a folder, then when in the DTS you can double-click on the freight bill to have the PDF copy appear on the screen. Some users will scan and invoice and supporting freight bills into one PDF file and then have the ability to double-click on the invoice to view/print/email the information.

## Revenue By Billing Code

This new feature is available in version 25.02 onwards. Access this report from the [Reports] button on the Receivable Invoices screen. Select the date range of the invoices to include. Use the [Select] button to display a unique list of the billing item codes that were used in this time period. To remove codes from the report, simply double-click on the code.

Revenue By Billing Code (Re...)

Invoice Begin Date: 03/01/22  
Invoice End Date: 03/31/22

Double-click on billing code to remove it from the report.

## IFTA Reporting

The Dump Truck System assists in tracking and reporting on International Fuel Tax Association (IFTA) requirements. The IFTA screen is composed of three information areas. The top portion identifies and accumulates amounts for a single trip sheet. The left side tracks mileage. The right side tracks fuel.

When the screen is entered, the most recent sheet is displayed. Use the [<] and [>] buttons to scroll through the Trip Sheets. Alternatively, you can use the up and down arrows on the keyboard to scroll. These are the arrows that point towards and away from you. To go directly to a sheet, use the built-in query feature. Click on the item you wish to find and press the [F7] key on the keyboard. The screen portion will clear. Type in the item to match. For

example, to query all trip sheets for truck FF11, type in FF11 in the Truck field. Then, press **[F8]** on the keyboard. The matches appear and may be scrolled.

Date	St	Odom Start	Odom End	Miles	Date	City	St	Gallons	PPG	Total

The **[Back]** button exits the IFTA Tracking screen. Click on **[Save]** to commit any pending changes. The **[?]** brings up this user guide in PDF format.

The creation of sheets and in particular, the time frame is up to you. Click on **[New Sheet]** and enter the truck number and start date of the trip. The next sequential sheet number is provided for you, but the sheet number can be specified as needed.

### IFTA Tracking Reports

The following reports can be accessed by clicking on the **[Reports...]** button.

### Blank Trip Sheets

This option displays a blank trip sheet. Print as many copies as desired. The layout is similar to the IFTA screen. The width between the lines is large enough for the drivers to legibly enter information.

## Fuel Location Report

The Fuel Location report prompts for a date string. All fuel entries will be grouped by state and city.

FUEL LOCATION REPORT				02/11/2014
