

Late Tickets

When Independent Contractors turn in tickets late, there is no guarantee that the customer will pay. The Dump Truck System has a feature where you can mark the tickets as being turned in late. These late tickets show up in the "What Needs Paid" reports but will not be placed on a pay statement unless someone reviews the tags and marks them as being paid. In addition, the DTS tracks the date the ticket was turned in. some companies will pay late tickets after 60 days automatically. If the ticket is dated in January and turned in June 1st. You will want the 60-day counter starting from June not January!

When the Late Freight Bills screen is entered, a small window appears. Enter the date up to which you want the tickets to appear.

The following screen shows that the invoice number 123651 was paid so the user clicked in the "Pay" column to allow these tickets to be picked up on the next pay statement.

Date	Turned In	Days Pay?	Ft Bill	Weight Ticket	Pay Code	Independent Contractor	Customer	Invoice	Balance
